MUHAMMAD DAWAR

Full Stack Developer

+92-302-0103633 • dawar.malik29@gmail.com • **Video CV** • **Portfolio** • LinkedIn • GitHub

SUMMARY

Full Stack Developer experienced in building responsive, maintainable web applications using **Next.js, React, Node.js**, and **PostgreSQL/MongoDB**. Skilled in **QA automation** with **Playwright (Python + Pytest)** and workflow automation using **n8n** to improve process efficiency. Focused on writing clean, scalable code and continuously advancing technical expertise across modern web and automation technologies.

EXPERIENCE

Full Stack AI Engineer
05/2026 – Present

Emergi Mentors

- Own end-to-end delivery of AI-driven products, driving architecture decisions, development, and deployment independently across the full stack.
- Rebuilt the internal Admin Panel from a legacy PHP/Blade system to Next.js, delivering a significantly faster, modern UI with smooth animations, integrating a Video Factory, YouTube content generation pipeline, and automated long-video-to-Shorts repurposing system.
- Built and maintained an AI-powered email automation workflow covering lead generation, personalized outreach, auto follow-ups, and human-in-the-loop replies using n8n, Gemini AI, and Google Sheets, reducing manual outreach by 70%.
- Built a RAG-based chatbot using n8n, Pinecone vector storage, and Gemini API for embeddings and responses, replacing the existing third-party system and improving retrieval accuracy by 40%.
- Independently evaluate and propose technical stack and architecture decisions, contributing directly to engineering direction alongside the lead engineer.

Graduate Full Stack AI Engineer
05/2025 – 05/2026

Emergi Mentors

- Developed and maintained core frontend features using Next.js and React.js, delivering high-performance, responsive UI with consistent bug fixes across the platform.
- Built the company's Resume Analyzer tool in Next.js, which became the highest-traffic page on the website, increasing overall engagement by 80% and contributing significantly to lead generation.
- Designed and implemented a QA automation suite using Playwright with Python and Pytest for end-to-end testing of booking, payment, and communication flows, reducing regression testing time by 60%.
- Built the Career Roadmaps platform in Next.js, integrating backend APIs to deliver structured roadmaps with real-time progress tracking across multiple career fields.

SKILLS

- **Frontend:** Next.js, React.js, HTML/CSS, JavaScript, Typescript, Framer Motion, Bootstrap, Tailwind CSS
- **Backend:** Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB
- **Automation & Workflows:** n8n (Workflow Automation), Email Campaign Automation
- **Testing & QA:** Playwright (Python + Pytest), Jest, React Testing Library
- **Tools & Platforms:** Git/GitHub, Bitbucket, Postman, Figma (for prototyping and collaboration)

PROJECTS

- **Personal Portfolio Project** | *Next.js, Typescript, Tailwind CSS, Framer Motion* | GitHub – **Live Preview**

  Designed and developed a fully responsive portfolio website using **Next.js** and **TypeScript** to showcase personal projects and skills. Integrated **Tailwind CSS** for clean UI design and **Framer Motion** for smooth animations. Included a working contact form with message functionality.

- **Airbnb Clone** | *Next.js, Typescript, MongoDB, Prisma ORM, NextAuth, Tailwind* | GitHub – **Live Preview**
  Built a full-stack Airbnb clone using **Next.js** and **TypeScript** with server-side rendering and API routes. Implemented **MongoDB** with **Prisma** ORM for efficient database management, and integrated **NextAuth** for secure user authentication. Used **Tailwind** CSS for responsive UI and **Zustand** for scalable state management. Featured dynamic listings, user profiles, and booking functionality.
- **E-commerce Website** | *React.js, Node.js, Express.js, PostgreSQL* | GitHub – **Live Preview**
  Developed a full-stack e-commerce website using **React.js** (With **Redux** for state management) on the frontend and **Node.js** with **Express.js** on the backend, integrating **PostgreSQL** with **Prisma** ORM for database management, featuring dynamic product listings, secure authentication, and efficient order processing.
- **AI Resume Analyzer** | *Next.js, Typescript, Gemini Api, Tailwind CSS, Framer Motion* – **Live Preview**
  Built an online resume analyzer using **Next.js**, leveraging its built-in API routes to process LLM requests. The tool calculates ATS score based on the job title, gives quick wins to boost the score, compares resumes against FAANG benchmarks, and visually highlights strong and weak areas in the resume.
- **AI-Powered Outreach Automation** | *n8n, Apify, Gemini API, Google Sheets*
  Built an end-to-end lead generation and email automation workflow using **n8n**. Integrated **Apify** to scrape leads from Apollo, filtered valid contacts, and generated personalized AI-crafted emails. Automated follow-ups, reply detection, and dynamic AI responses. Utilized **Google Sheets** for real-time lead tracking and analytics.
- **RAG Chatbot (Emergi Assistant)** | *n8n, Gemini API, Pinecone, GPSE* – **Live Preview**
  Developed a context-aware RAG chatbot by building a workflow in **n8n**. Integrated **GPSE** for real-time querying of company social media posts, generated embeddings using Gemini, and stored them in **Pinecone**. The chatbot retrieves relevant information to answer queries using **Gemini** LLM.

TRAINING / COURSES

- **Web Development Bootcamp (Udemy)** - focused on building fully functional web applications using diverse technologies.
- **React - The Complete Guide 2024 (Udemy)** - Deep dive into modern React practices, including **Next.js** and **TypeScript**.

EDUCATION

- **University of Wah**
  Bachelor of Engineering
